Illinois Prairie Community Foundation Grant Supports Early Developmental Screening at The Baby Fold

NORMAL, IL. — The Baby Fold has received a grant from the Illinois Prairie Community Foundation to enhance early developmental screening through its Healthy Start and Caregiver Connections programs.

Grant funding provided Ages & Stages Questionnaires® (ASQ) screening kits, French-language questionnaires, and screening materials that help staff identify developmental delays early and connect children and families with evaluations, resources, and intervention services when needed.

"Early identification gives children the best opportunity to thrive," said Sam Guillory, Vice President of Development and Public Relations at The Baby Fold. "We are grateful to the Illinois Prairie Community Foundation for investing in resources that strengthen children and families throughout our community."

The Baby Fold thanks the Illinois Prairie Community Foundation for its partnership and commitment to helping children reach their full potential.

Founded in 1902, The Baby Fold serves more than 1,200 children and families annually across Central Illinois through programs that strengthen families and support healthy child development.
